

BRAKE BLOCKS FOR HOPPER HOIST DRAWWORKS

Brake blocks are mainly used in oil industry services. They equip the brake bands of the drawworks, air clutches of the different transmissions of the drilling rigs and other wellhead equipment.

The drawworks are the main component of the lifting equipment of a rotary drilling rig.

The drilling rig drawworks are equipped with high quality brake pads. Timely maintenance and replacement of brake pads will significantly reduce maintenance costs for Hopper Hoist drilling rigs.
